OUR RECYCLING COMPETITION

Issue #7

Marti and 12.g

Call to Action

Students of all ages, we must take action to protect our environment.

We can start by using the

recycling bins in our school building, as well as the color-coded containers located next to our school, on Angel

Kunchev Street.

Every day, our school produces a tremendous amount of waste, from paper and plastic to aluminum cans and glass bottles.

By taking the extra step to place these items in the recycling bins provided, we can make a positive difference.

Let's commit to reducing our waste and doing our part to help protect the planet. Let's start today!

The Ecopack recycling competition winners from the 4th grade with their teacher, Ms. Jeylan Boycheva <https://www.ecopack.bg/bg/ekoklas-2023>

Smallest class in school takes home the big prize!

On March 6th, after a month of recycling at home, the 4th graders brought in 60 out of 237 kilos for the school as a whole.

8 ^A - 2,0 кг	8 ^B - 5,4 кг
12 ^A - 2,1 кг	8 ^A - 22 кг
4 ^A - 60,1 кг	9 ^A - 11,7 кг
5 ^A - 17,8 кг	8 ^A - 9,4 кг
8 ^E - 24,6 кг + 2,8 + 28	9 ^B - 8,100 кг
7 - 17 кг	11 ^A - 8,5 кг
12 ^A - 9,4 кг	10 ^B - 3,9 кг
12 ^B - 2,3 кг	
11 ^B - 3,2 кг	
10 ^B - 1,5 кг	
9 ^A - 3 кг	
11 ^B - 1,3 кг	
8 ^B - 1,8 кг	

On the Importance of Recycling at Home

Recycling is an important part of everyday life. It is a key component to preserving our environment and reducing our carbon footprint. Recycling at home is one of the most effective ways to ensure that our environment is being taken care of. It can help reduce waste, conserve energy and resources, and prevent pollution.

First and foremost, recycling at home helps reduce waste. By recycling products such as paper, plastic, and glass, we can help reduce the amount of waste that ends up in landfills. This helps reduce the environmental impact of these materials, as well as saving space in landfills. Additionally, recycling helps conserve resources. By recycling, we can reuse materials instead of having to create new materials, which helps reduce our

need for raw materials that would otherwise have to be obtained. This helps conserve our natural resources, such as trees and oil.

Recycling at home also helps prevent pollution. By recycling, we can prevent pollutants from entering our air, water, and soil. This is especially important for hazardous materials, such as batteries and electronics, which can be dangerous if not disposed of properly. Recycling these materials helps ensure that these pollutants are not released into the environment.

Finally, recycling at home can help conserve energy. By recycling, we can reduce the energy needed to create new products, which can help reduce our reliance on fossil fuels. Additionally, recycling can help reduce transportation costs, as

recycled materials can often be reused closer to their original source, meaning that they do not have to be shipped long distances.

In conclusion, recycling at home is an important part of preserving our environment. It helps reduce waste, conserve resources, prevent pollution, and conserve energy. It is an easy and effective way to make a positive impact on our planet, and it is something that everyone can do.

Five-paragraph essay by 127Hours team

Don't forget to crush your bottle

Bottles must be crushed and all of the air removed. Be sure to replace the cap back on after you have done this. This causes more space to be saved at the processing facility.

Typical views from our classrooms at the end of the day...

Ecoclass 2023

4th grade rules!

Not only are they the smallest class in our school, with just 14 students, but they were also the youngest participants in this year's recycling competition! Congrats and many thanks to 4th grade teacher Ms. Boycheva and all the parents who put in their time and effort!

Special mention should be given to the 8e, with 28 kg, and 8a, with 22 kg!

On the less positive side, it should be noted that, with our modest 237 kg, we came last among the five schools in the first round of the competition in Sofia, far behind the leaders from 38th Elementary School with 1311 kg. Let's do better next year!
